

Disturbance, Disaster, and Cataclysm

Geosciences Spring Seminar Series, 2003

Geo 407/507 CRN 31535/31536. All seminars at 4:00 PM on
Tuesdays and Thursdays in Gilfillan Auditorium

- 4/1 Grant Heiken Volcanoes, cities, and human security
- 4/10 Kris Harper Controlling the environment: From marginal science to mainstream research
- 4/15 Eldon Gath Stream basin development, tectonic deformation, and seismic hazards for the southeastern Los Angeles basin
- 4/17 Peter White The search for generality in studies of disturbance and ecosystem dynamics
- 4/22 Jack Schmidt Disturbances in regulated rivers -- the role of floods in restoring the Colorado River system
- 4/24 Jon Major Posteruption suspended-sediment transport--decadal-scale trends and transport hydrology at Mount St. Helens
- 4/29 Ariel Lugo Caribbean Forests: ruin and recovery following hurricane
- 5/6 Babs Battenfield Geospatial information management in a hostile environment
- 5/15 Colin Long Millennial-scale variations in vegetation, fire, and climate in seasonal temperate rain forest of western North America
- 5/29 Dave Montgomery Rivers of fire and ice: Observations on catastrophic fluvial disturbances at Mount Pinatubo and eastern Tibet
- 6/3 William Graf Geomorphology and American dams: The scientific, social, and economic context
- 6/5 Brian Atwater Japanese records of the 1700 Cascadia tsunami
